

Information Technology Manager

Olon France, part of Olon Group, is an expert and fast-growing contract development and manufacturing organization (CDMO), operating within the Biotech Division of the Olon Group. Specialised in process development and manufacturing of antibodies, proteins, bioconjugates and nanodrugs, the Company is focused on providing end-to-end services to support biopharma industry clients at all stages of their drug development, from R&D to commercial manufacturing.

We are looking for a dynamic **Information Technology Manager** to join us in meeting our future challenges.

This position is primarily based in Toulouse, with a functional reporting line to Olon's IT Headquarters in Italy and an operational reporting line to the CEO in France. The Information Technology Manager is supported by another IT team member.

Your Responsibilities

- With a hands-on approach, lead the company's IT activities and ensure that the IT applications and infrastructure are efficient, secure, and adapted to the business needs, covering the 4 facilities in France (Toulouse, Labège, Veyre-Monton and Saint Julien en Genevois).
- Manage the delivery of IT projects meeting time, specification and cost objectives in accordance with corporate defined work and quality methods.
- Work consistently in conjunction with the leadership team, to gather requirements, support changes, communicate Corporate strategies and contribute to define the local IT budget.
- Provide input to Service Level Agreement definition for IT support Vendors and manage related contracts.
- Contribution to IT strategy and opportunities.

Profile

- A minimum of 3-5 years of relevant experience in Information Technology.
- Bachelor's degree in Computer Science, Information Technology, or a related field.
- A previous experience working in the Pharmaceutical, Food Industry, or other GMP/GxP environments, or industries with robust Assurance Quality systems is considered an advantage.
- A Familiarity with Standard Operating Procedures methods would be considered a plus. Expertise in implementing and managing IT infrastructure, networking, applications, and security systems.
- Good problem-solving, decision-making, and communication skills. Fluent professional English is mandatory

What We Offer :

- Permanent contract (CDI), annual working time arrangement of 218 days with compensatory leave (forfeit jours + JRTT)
- Full employer-funded company health insurance, 1 day of teleworking per week, time savings account (CET), sustainable mobility allowance for bicycle use.
- A dynamic and innovative work environment open to creativity and personal contributions, with opportunities to participate in pioneering projects in a fast-evolving industry.
- Access to training programs and internal mobility opportunities in line with Olon Group strategy.
- An inclusive and supportive environment promoting diversity and integration for all.

More about the company :

Olon Group is a global leader in the development and production of active pharmaceutical ingredients (APIs) for both CDMO and generic markets. The Group integrates chemical synthesis and biological processes, adhering to the highest international standards for safety, quality, and environmental sustainability.

Olon France consolidates the assets of Olon Group in France, encompassing four key sites: Veyre Monton, Labège, Toulouse and Saint-Julien en Genevois. Together, these sites employ approximately 150 professionals and deliver comprehensive service offerings in development and manufacturing as a leading CDMO (Contract Development and Manufacturing Organization).
